

# Virtual Support to Supplement your In-House Team

Outsourcing isn't just for sole traders. Did you know that Get Ahead supports larger businesses too, slotting in seamlessly with your regular employees?

Here's how we can help organisations with existing teams to work smarter:

**Tasks that don't fit comfortably into anyone's role** – who deals with general enquiries when you all have defined roles?

Enlist a virtual assistant to cover the problem task

**Unrealistic skill combinations** – do you have an employee who's great at Photoshop but struggles with Excel, and is expected to be good at both?

Split the skills between a strong in-house team member and an experienced virtual expert

**Natural strengths and personalities across the team** – are you strong on innovation but light on delivery?

Keep your great innovators and outsource the implementation

**Reliance on apps** – have you got junior team members propped up by technology to deliver work they don't fully understand?

Outsource to an expert who knows how to use the app but understands the task inside out

**Holiday/sickness cover** – how will you implement projects with key staff members away?

Let Get Ahead keep your business moving
